THEODORE ALEXANDER

CUSHIONS AND BACK PILLOWS

Our standard cushion and pillow construction depends on the design and is listed in the specifications for each individual piece.

Below is a brief description of the cushion and pillow construction available.

SEAT CUSHIONS LISTED FROM SOFTEST TO FIRMEST.

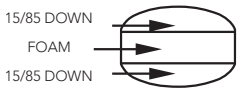
SEAT CUSHIONS

CHATSWORTH DOWN CUSHION

This cushion is constructed with thick pads of 25/75 down. It is intended for use by those who wish to have the ultimate in down cushioning. Even though this cushion has a spring unit encased in a Ultracell polyurethane foam core; the thick pads of down requires fluffing. Down proof ticking is used throughout.

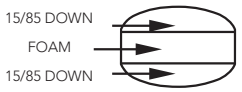
REGENCY DOWN CUSHION - STANDARD » *see construction at page 2*

This cushion is standard in most TAU upholstery and is constructed with two double layers of down proof ticking, channeled to prevent migration of down and filled with 15/85 down. The core of this cushion is made of Ultracell polyurethane foam. Because of the down content this cushion requires periodic fluffing to retain its original shape and crown.



REGENCY PLUS CUSHION

This cushion is available at no additional cost; it is simply a firmer version of the standard Regency Down Cushion. The construction is exactly the same as Regency Down, the only difference is a slightly firmer polyurethane core that stands up to higher use levels and keeps its shape with less maintenance.

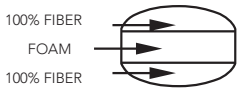


SPRING DOWN CUSHION

This cushion is constructed with two double layers of down proof ticking, channeled to prevent migration of down and filled with 10/90 down and fiber. The core of this cushion is made with a spring unit encased in high grade polyurethane foam. Because of the down content this cushion requires periodic fluffing to retain its original shape. Due to the design and crown of this cushion, the sateen deck may be visible under certain conditions.

HPC CUSHION

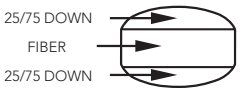
This cushion is an optional hypoallergenic cushion for those customers that suffer with allergies to down and feathers. The core of this cushion is made of Ultracell polyurethane foam and wrapped in 100% fiber.



BACK CUSHIONS

➤ OXFORD DOWN BACK PILLOW - STANDARD

This back pillow is standard on most TAU upholstery and is constructed with two double layers of down proof ticking, channeled to prevent migration of materials, and filled with 25/75 down. The center section of each is filled with a micro-denier fiber. This fiber's resiliency helps the back pillow retain its original shape. Because of the down content, this pillow requires periodic fluffing to retain its original shape and crown.



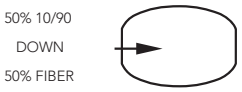
➤ DOWN BACK PILLOWS

SOFA | LOVESEAT | CHAIR

These pillows are constructed of two layers of down proof ticking filled with 25/75 down. Because of the down content, these pillows require periodic fluffing to retain their original shape and crown.

BLEND DOWN BACK PILLOW – NO CHARGE

This back pillow is standard in a few pieces and optional throughout the TAU line, it is constructed of two double layers of down proof ticking, channeled to prevent migration of materials and filled with 50% fiber and a 50% Down and Feather mix. Because of the down content, the back pillow does require some periodic fluffing to maintain its shape.



HPB BACK PILLOW – NO CHARGE

This is an optional hypoallergenic back pillow for those customers that suffer with allergies to down and feathers.
